

“One and done” isn’t a claim.  
It’s a **GUARANTEE.**

Head lice are a world-wide epidemic. In the US, children miss around 24 million days of school every year due to outbreaks. And when lice strike, time is of the essence. We sympathize with the stress and anxiety you may feel when you discover a lice infestation. We have families, too. We feel your pain.

But take heart. You are not alone in this.

Lice Clinics of America offers the first one-treatment cure for head lice, with the safest, most effective immediate care out there. And we guarantee our treatment works, for everyone, with just one visit. So you can get your life back to normal.\*

We offer three treatment options, depending on time and budgetary restrictions. We have a medically sanctioned device for in-clinic care; and we have several do-it-yourself products, plus our preventative formulas for in-home use.

Lice Clinics of America was conceived with one simple goal in mind: to give parents and caregivers the safest, most complete and effective head lice treatments available. Because these outbreaks affect all of us. Lice Clinics of America. One treatment and lice are history.

Finally  
a cure  
for  
head  
lice.

### THREE TREATMENT OPTIONS

#### Signature AirAllé® Treatment

This 3-step lice-removal process includes our FDA-cleared AirAllé® device, a heated-air tool used to dehydrate lice and their eggs (nits). A gentle comb-out to remove all dead lice and egg. And a soothing topical rinse. Because it is done entirely in our clinic, this is the only treatment that is 100% guaranteed\* to leave you lice free.

#### Express AirAllé® Treatment\*\*

The Express lice-removal process (less costly than the Signature AirAllé® Treatment) includes an in-clinic visit. We will kill the head lice and eggs, using our FDA-cleared AirAllé® device, in about 30 minutes. At home, you will comb out the dead lice and eggs using a comb we provide. Follow up with our soothing topical rinse.

\*\*Not available at all clinics

#### Do-It-Yourself Treatment

Our DIY treatment kit includes all the topical treatment products required to kill head lice and remove nits. When you pick up supplies, one of our clinicians will provide detailed instructions on how to properly perform the comb-out with the DIY kit. Treatment is conducted over a 10-day period.

### GET THE **GUARANTEE** \*

Did you know the most popular over-the-counter lice product sold today is less than 45% effective in killing lice and eggs? Our Signature AirAllé® Treatment guarantees lice will be gone in a single treatment. Leave 100% lice-free. Eggs and all. Call our clinic for details.

\*In-clinic guarantee requires Signature AirAllé® Treatment

### GET YOUR **LIFE BACK**

For far too long, parents and caregivers have endured time consuming, expensive and only moderately effective head lice treatments. These treatments are often inconvenient and can sometimes cause injury.

Lice Clinics of America will provide you with the safest, most effective urgent care head lice treatment that works every time.

### GET THE **FACTS**

Treatment Options	 Lice Clinics OF AMERICA® <small>Utilizing AirAllé medical device</small>	Sklice (Prescription Pesticide)	Nix (Over-the-counter Pesticide)	Nitpicking & Combing
Treatments Required	1 treatment utilizing the AirAllé® FDA-cleared medical device	1 treatment plus combing required	3+ treatments plus combings required	3+ treatments + combings required. Any missed eggs or live bugs can lead to recurrence.
Pesticides Used	none	Ivermectin, .5%	Permethrin, 1%	none
Clinical Trial Results	99% Combined efficacy on live lice and eggs using device, dimethicone and comb-out (93.7% with device alone)	71% - 76% For live lice only	43% - 45% For live lice only	none
